

## Road&Track by Öhlins

No one can argue about the fact that this car is one of the most fun track-day cars on the planet, built in the Hethel factory in Norfolk/Great Britain. The fantastic combination of a light-weight fibreglass body, aluminium chassis, 1,8L 4-cylinder engine and a top speed touching 240 km/h makes all motorsport enthusiasts smiling up to the ears.

The aim for the engineers at Öhlins R&D department was to create a shock absorber that did not only target at better comfort but also at increasing the performance and handling, cutting precious time on the track. The end result is a 36mm aluminium cylinder shock with compression and rebound adjusters along with a clever height adjuster.

### Key Features

- Light weight
- One way compression adjuster
- One way rebound adjuster (shaft bleed) also acts as temperature adjuster
- Height adjustable (spring preload)
- Coil springs (front 62N/mm, rear 85N/mm)
- Rebuildable
- Revalveable

### Part Numbers

OPV1E00  
OPV2E00  
OPV3E00  
OPV4E00

*For a complete set order one of each part number.*
